

KEY VAULT

Advanced key management.

Designed to meet the requirements of insurance companies in the control, tracking and security of keys associated with risk to valuables or property, our range of Key Vaults offer twice as much security and strength provided by standard key cabinets. Constructed from 2.5mm fabricated steel with a 3mm flush closing door which includes removable hinge pins for easy upgrading, they are ideal for commercial use. These cabinets are also supplied as standard with a half euro profile cylinder that can be upgraded to integrate with an existing master key or security system. As with the System cabinets, the Key Vault has adjustable hook bars, a removable control index, sign-out tabs (to record a paper trail of key usage) and is also available in a deeper model for the storage of bunches of keys.

Key Vault 100
